

MiCare Add-Ons

NC-210 Beacon

Used to complement the MiCare Patient Unit, the MiCare NC-210 Beacon provides additional coverage with minimal installation. The MiCare Beacon plugs into a standard 120V wall outlet, connects with the mesh network and uses ultrasonic technology for positioning. The MiCare Beacon is fully supervised through continuous communication.

NC-103 Pull Station

The MiCare NC-103 Pull Station is a wireless endpoint that connects directly to the mesh network. The MiCare Pull Station features an emergency pull cord, emergency button, staff assist button, a maintenance button and visual event indicator. The MiCare Pull Station provides for one additional input (Personal or Environmental monitor), is germ wipeable and is fully supervised through continuous communication.

NC-500 Pendant

The MiCare NC-500 Pendant is a perfect addition to the MiCare Patient Unit. The MiCare pendant allows for mobility and additional protection of residents and patients. Featuring: an easy to push button, event signal indicator, germ wipeable casing, and is fully supervised through continuous communication.

MiCare Additional Peripherals

Dome lights, call cords, bed exit systems, and other devices integrate easily with the MiCare solution.

The Power of Wireless Mesh Networks

The MiCare Difference

- + The only wireless system with 2 Way Voice
- + Dual Method Locating: Ultrasonic & Triangulation
- + Web Enabled - no dedicated console
- + True Wireless Plug & Play

MiCare Makes Managing Easier

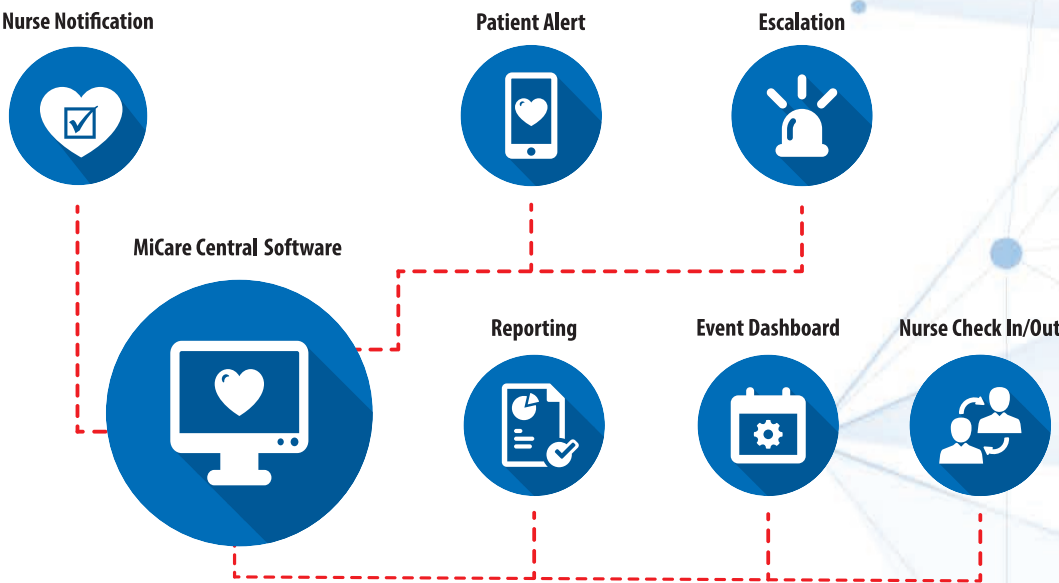

Using an Advanced Mesh Network, MiCare makes residents and patients safer than ever before:

- ✓ **Fully Supervised System**
Every device is software supervised.
- ✓ **Easily Customizable**
Almost every feature can be customized to your needs.
- ✓ **Wireless Mesh Network**
No Wires. Easy Installation.
- ✓ **Comprehensive Reporting**
Know what happened. Know where it happened. Clear, Concise and Customizable.
- ✓ **Centralized Management**
Update devices remotely.
- ✓ **Industry Leading Quality**
Conforms to Industry Standards: UL1069 and UL2560.

MiCare Wireless Nurse Call is a Leading Edge Network that Saves You Time and Money

Not only is it fast and easy to install but there is little labour intensive wiring. This powerful wireless solution provides big advantages over typical wired systems:

- Self Healing** Should one unit fail or lose power, other nearby units take over the notification task.
- Self-Aware** As each unit becomes initiated, it begins communicating with all devices within its proximity.
- Unified Protocols** This means you can communicate with any MiCare Peripherals or Beacons within the facility.

The Most Feature-Rich Wireless Nurse Call On The Market!

- ✓ **Easy installation** for retrofit sites and new builds.
- ✓ **Centralized programming** from our MiCare Central Software using global or targeted configurations.
- ✓ **Two-way voice communication** for situational assessment and awareness.
- ✓ **Unique identification** with all networked units and associated peripherals.
- ✓ **Extended coverage** using the MiCare Beacons, ZF3 three input modules, Pull Stations and Pendants.
- ✓ **Four supervised inputs** for wired pullcords, environmental triggers, and personal monitors.
- ✓ **Four dedicated outputs** for dome lights, locks, and other devices.
- ✓ **Emergency**, code blue, nurse-in, **staff assist**, nurse-out, **maintenance**, cancel, and custom buttons.
- ✓ **Device heartbeat**, low battery, external power and line failure **detection**.
- ✓ **Ergonomic design** with germ wipeable plastic on all devices.
